- One 3 inch (76.1 mm) polypropylene driver with butyl rubber surround
- Weatherized components for indoor/outdoor applications.
- Theft- and corrosion-resistant mounting mechanism with an indexed swivel-joint for precision aiming in any direction.
- Ultra-low profile ZeroReflection™ ABS enclosure (4 inch diameter by 3.5 inch deep, including mounting plate).
- Five position selectable tap switch (SM31-EZ-T only)
- Corrosion-resistant, powder-coated aluminum grille.
- UL 1480 (UEAY) approved.
- High quality black or white paint finish.
- Optional accessories: the SM31-EZ-T includes a 20-watt transformer (AC-31-XFMR) that incorporates a 5 position tap switch and a wall plate for installation in a single-gang deep junction box. This transformer kit is also available as an optional accessory.

Description

The SM31-EZ(-T) is a premium full-range 3 inch surface-mount speaker, with overall dimensions smaller than a 4 inch sphere. The SM31-EZ(-T) incorporates a proprietary attachment with indexed swivel-joint for complete hemispherical aiming. Components have been weatherized for indoor/outdoor applications.

The SM31-EZ is an 8 ohm speaker without transformer. The SM31-EZ-T is shipped with the AC-SM31-XFMR transformer module to add a 20W transformer and 5 position tap switch that mounts into a single-gang deep junction box.

Applications

Engineered for rapid installation and low profile mounting for smaller venues, the SM31-EZ(-T) is ideal for retail, restaurants, conference rooms, patio areas, educational facilities or any setting where full-range intelligibility, unobtrusive design and installation ease are paramount. For additional bass response down to 41 Hz (-10 dB), the SM1001p powered 10-inch subwoofer may be incorporated.

Architectural Specifications

The loudspeaker transducer shall consist of one full-range 76.2 mm (3.0 in.) polypropylene cone with butyl rubber surround.

Performance specifications for a typical production unit shall be as follows: Useable frequency response shall extend from 100 Hz – 22 kHz (- 10 dB). Measured sensitivity (2.83 volt input, 1 meter) shall be at least 86.0 dB. The speaker shall have a nominal impedance of 8 ohms, with an optional 20-watt transformer (AC-SM31-XFMR) for distributed systems. The optional transformer shall have a five-position tap switch for 25-, 70.7- and 100-volt applications. Rated power capacity shall be at least 20 watts continuous (RMS) and conform to EIA-426-B. Maximum continuous power output at 1 meter shall be 101 dB.

Surface-mount installation for the unit is designed to mount to wall, ceiling or other rigid structure. When the optional 20-watt transformer is incorporated, mounting shall be to a single-gang deep junction box. Vertical and horizontal pivoting shall be employed to offer unlimited aiming capability for indoor and outdoor applications. Installation for the speaker shall be by proprietary and corrosion-resistant ball mount with an indexed swivel-joint for precision aiming.

External wiring shall be by low-profile screw terminal and shall accept from 10 – 22-gauge wire. The system shall be for indoor/outdoor applications.

The enclosure shall be constructed of injection-molded, ABS. The grille shall be constructed of powder-coated aluminum for lasting performance and affix to the speaker baffle via pressure fit. Overall cabinet dimensions shall be no more than 110.4 mm (4.35 in.) in height by 110.4 mm (4.35 in.) in width by 96.9 mm (3.81 in.) in depth including the mounting bracket.

The system shall be the SM31-EZ for low-impedance applications or the SM31-EZ-T for high-impedance applications.
