SoundTube 31-EZ Series Packs Full Fidelity into Small Size

New line of ceiling-mount, surface-mount and in-wall speakers provide great sound in tiny 3" enclosures.

SoundTube Entertainment, the leading manufacturer of high-performance commercial speaker systems, has introduced the new 31-EZ Series of surface-mount, ceiling-mount and in-wall 3" speakers. These high fidelity micro modules offer outstanding sonic performance with simple mounting and high power handling. The series includes:

- **SM31-EZ**, a surface-mount, 3" (76 mm) speaker incorporating a 3" polypropylene full range driver with butyl rubber surround. The speaker features a new SoundTube-exclusive mounting system that rotates 0 to 90°, connected to a wall plate that swivels 173° in both directions. No tools are needed to lock the speaker's positioning. With all wires connecting at the speaker's wall plate back box, installations contain no visible wires; components are weatherized for indoor or outdoor use. The SM31-EZ is available in black or white (custom colors available); models are available with and without a 20W transformer package.
- **CM31-EZ**, a ceiling-mount speaker with a 3" polypropylene full range driver with butyl rubber surround in a shallow 3.75" (95 mm) backcan. The speaker features SoundTube's rapid fixed-wing installation and incorporates a 20 watt transformer plus black or white grille (custom painting available). Components are weatherized for durability.
- **IW31-EZ**, an in-wall speaker providing a 3" polypropylene full range driver with butyl rubber surround in a 3.75" backcan. This unit also offers SoundTube's rapid fixed-wing installation, a 20 watt transformer, and a square grille in black or white (custom painting available). An optional theft-resistant stainless grille is also available.

For additional bass response, the new SM1001p powered 10-inch subwoofer may be paired with 31 Series speakers. The SM1001p can be surface-mounted, suspended, or freestanding to meet room design requirements.

"The 31-EZ Series proves that a small size can yield big results," said Duke Ducoff, Vice President of Sales for MSE Audio Group. "They are little enough to fit just about anywhere but still bring full fidelity sound to the installation. System designers will find them very useful in filling out audio spaces in attractions, restaurants or entryways."

SoundTube Entertainment, based in Park City, Utah, develops, manufactures and markets RSi open-ceiling, CMi in-ceiling, SMi surface-mount, XT outdoor, HPi high-power and FP sound-focusing speaker models. SoundTube products are installed in many of the world's best-known commercial operations. All SoundTube products come with a five-year limited warranty. SoundTube is part of the MSE Audio Group.
