SoundTube 8" Surface Mount Speakers Provide Superior Coverage, Easy Installation

Las Vegas NV, Global Gaming Expo, Booth 775 - SoundTube Entertainment, the leading manufacturer of high-performance commercial speaker systems, has introduced a new line of 8" surface mount speakers.

Delivering high SPL and high efficiency with superior coverage, the **SM890i** incorporates an 8" (203 mm) treated fiber woofer and a high-power horn-loaded compression driver with SoundTube's BroadBeamHP[®] technology to deliver a consistent dispersion pattern, edge-to-edge coverage, and superb intelligibility. The SM890i uses a 120 watt low insertion loss transformer with a low profile, corner-mounted 6 position tap switch for 25V, 70.7V, 100V or 8 ohm direct output. A proprietary tool-free bayonet-mounted horn offers tailored dispersion and throw.

The **SM800i** comprises an 8" flat woofer and a concentric 1" (25 mm) convex aluminum tweeter with an 8" passive radiator for augmented low frequency response down to 50 Hz. Its BroadBeam[®] waveguide technology provides maximum intelligibility with edge-to-edge coverage. The SM800i also includes a 120 watt low insertion loss transformer and a low profile, corner-mounted tap switch for 25V, 70.7V, 100V or 8 ohm direct output.

The SM890i and SM800i feature a new, SoundTube-exclusive mounting system that makes installation and aiming fast and easy. The mounting system uses a die-cast aluminum mounting plate and a tool-free hollow ball-joint assembly which rotates 45° in all directions.

Designed for cost-conscious customers who still need great sound, the **SM82-EZ** is a two-way coaxial speaker with an 8" polypropylene woofer and an offset 1" aluminum dome tweeter with

waveguide. Its low-profile bracket mount allows aiming up to 90° (single axis); a 64-watt low insertion loss transformer allows for 25V, 70.7V, 100V or 8 ohm direct output.

All three products in the series may be ordered in black or white, with custom colors available; optional stand mount adapters are also available for the SM800i and SM890i.

“With their superior intelligibility and coverage, the SM8 speakers are perfect for a wide range of applications, and they can be used indoors or out,” said Duke Ducoff, VP of Sales for MSE Audio Group. “These products’ ease of installation and overall sound quality make them ideal for venues of any size.”

SoundTube Entertainment, based in Park City, Utah, develops, manufactures and markets RSi open-ceiling, CMi in-ceiling, SMi surface-mount, XT outdoor, HPi high-power and FP sound-focusing speaker models. SoundTube products are installed in many of the world’s best-known commercial operations. All SoundTube products come with a five-year limited warranty. SoundTube is part of the MSE Audio Group.
