SoundTube Speakers Meet All Gaming Installation Needs

With models for open-ceiling, in-ceiling, in-wall, surface-mount, outdoor and focused-point applications, casinos can have superior sound coverage everywhere.

SoundTube Entertainment, the leading manufacturer of high-performance commercial speaker systems, showed a variety of loudspeaker options for the Indian Gaming community at NIGA 2010.

Offering superior coverage and intelligibility with patented technologies for speaker dispersion and mounting, SoundTube provides options for music, paging and alarm messaging throughout all types of facilities. SoundTube also offers the industry's largest selection of UL-listed speakers. Product offerings include:

CMi and CM-EZ in-ceiling speakers – with ten CMi models and seven CM-EZ models, SoundTube offers one of the industry's broadest ranges of in-ceiling speakers. CMi models feature SoundTube's patented BroadBeam® dispersion technology which ensures optimal coverage with maximum intelligibility; the CM-EZ units provide high efficiency with reduced power requirements.

RSi and HPi open-ceiling speakers – available in sizes ranging from 4" to 10", RSi and HPi speakers provide superb coverage with aesthetics that will blend in easily with the room's architecture. RSi speakers are engineered with SoundTube's BroadBeam technology for maximum coverage and intelligibility; HPi speakers are designed for high power applications and feature BroadBeamHP™ to ensure the best sound in long-throw situations.

SMi surface-mount speakers – these easy-to-mount speakers provide superb coverage for patios, lounges, nightclubs and other venues. Ranging in size from 3" to 8", SMi speakers are sonically matched to SoundTube's in-ceiling and open-ceiling models to provide consistent sound for visitors as they move through the gaming facility. Models are available for both indoor and outdoor use.

XT outdoor speakers – designed for garden areas, walkways, patios and outdoor cafes, these weatherproof speakers enhance the visitor experience by carrying music and venue messaging to visitors no matter where they may be. Units are available as in-ground models or the XT-RockSolid-II, a unique "rock" speaker with no grille holes and omnidirectional coverage.

FP focused-point speakers – ideal for point of purchase kiosks or themed displays, these speakers focus audio in a specific area to convey the desired message without unwelcome interruption in other areas. Modules are available to provide on-board amplification with direct MP3 playback trigger audio on detection of motion, activate a light, and deliver targeted scents.

SolidDrive transducers – offering “Sound Without Speakers”, these unique patented transducers convert virtually any solid surface into a loudspeaker. Units are available for in-wall mounting, surface mounting (desk / tabletop) or glass mount. With SolidDrive, high-quality sound emanates from the entire surface. These units are ideal for storefront windows, private dining areas, executive suites and meeting rooms.

In addition to these highly popular models, SoundTube also offers in-wall speakers in 3” and 5” sizes and raw-frame speakers in 4” and 12” models for retrofitting old speaker installations; the company also offers the SA-202 amplifier, a small 20W stereo amp.

“We’re pleased to offer our products to the Indian gaming community,” said Duke Ducoff, MSE Audio Group VP of Sales. “We understand the need for not only high audio quality, but products that meet safety and notification requirements for installers and owners. That’s why go through the arduous process of obtaining UL listings on most of our products.”

SoundTube Entertainment, based in Park City, Utah, develops, manufactures and markets RSi open-ceiling, CMi in-ceiling, SMi surface-mount, XT outdoor, HPi high-power and FP sound-focusing speaker models. SoundTube products are installed in many of the world’s best-known commercial operations. All SoundTube products come with a five-year limited warranty. SoundTube is part of the MSE Audio Group.
