SoundTube Updates SPEC Design Software

Free design utility assists integrators, users in determining loudspeaker layout.

PARK CITY, UT - SoundTube Entertainment has announced SPEC 3.0, an updated version of the company's free loudspeaker layout software.

SPEC is a program that assists designers and integrators in determining the number of SoundTube loudspeakers to be used in a room. The user enters the room size, ceiling height, desired sound level, and the type of SoundTube speaker(s) desired; the program then provides the number of loudspeakers needed for the room with approximate spacing for installation.

Currently, the SPEC software is web based and available via the SoundTube website; the company plans a downloadable version to be available later this summer.

SoundTube products and SPEC software will be shown at InfoComm booth #N5851.

For additional information about any SoundTube product, contact the company at (800) 647-TUBE (8823), (435) 647-9555 or sales@soundtube.com.

SoundTube Entertainment, based in Park City, Utah, develops, manufactures and markets RSi open-ceiling, CMi in-ceiling, SMi surface-mount, XT outdoor, HPi high-power and FP sound-focusing speaker models. SoundTube products are installed in many of the world's best-known commercial operations. All SoundTube products come with a five-year limited warranty. SoundTube is a subsidiary of MSE Audio Group based in Overland Park, KS.
