## **SolidDrive Products Obtain UL Approvals**

*Products now approved for general and plenum ceiling applications.*

**PARK CITY, UT** - SoundTube Entertainment, the leading manufacturer of high-performance commercial sound systems, today announced that the SolidDrive product line is now approved by Underwriters Laboratories for general applications (UL1480) and plenum ceiling (UL2043) uses.

SolidDrive® is a patented technology using a hidden sound transducer that transmits acoustical energy through almost any solid surface. The entire surface becomes a speaker delivering high quality sound with the frequency response of conventional diaphragm speakers. SolidDrive transducers can be installed directly behind walls or ceilings, under tables and even on glass surfaces, creating omnidirectional sound that immerses the listener in audio.

“With the UL approvals, installers can be assured of SolidDrive’s reliable performance and conformance with safety requirements while creating unique audio environments for their customers,” said Duke Ducoff, SoundTube Director of Sales. “This product is ideal for any client who wants sound without visible speakers.”

-----

SoundTube Entertainment, based in Park City, Utah, develops, manufactures and markets RSi open-ceiling, CMi in-ceiling, SMi surface-mount, XT outdoor, HPi high-power and FP sound-focusing speaker models. SoundTube products are installed in many of the world’s best-known commercial operations. All SoundTube products come with a five-year limited warranty. SoundTube is a member of the MSE Audio™ Group based in Overland Park, Kansas.
